# Unhinged Custom Doors

Unhinged Custom Doors offers high quality, custom doors made to fit IKEA cabinets. Before starting this company we had been working with IKEA cabinets for nearly a decade, installing them in hundreds of kitchens all over Western Washington. During that time, we've come to trust and respect the quality and design of their cabinets – especially the Blum hardware they use for all of their drawer assemblies and hinges.

With IKEA cabinets you get tremendous value, so it's no wonder they are so popular, but the selection of door styles is limited. So, we saw an opportunity to offer even more bang-for-the-buck, by creating our own line of custom made doors for IKEA cabinets, and since IKEA allows their customers to purchase their cabinet frames and hardware separately from their doors and drawer fronts, you can achieve a truly magazine-worthy, custom cabinet look for a fraction of the price of fully custom cabinets!.

- All of our doors and drawer fronts come pre-bored, just like IKEA's stock doors, for easy installation.
- All doors and drawer-fronts come grain matched, or "sequenced" as standard.
- We offer doors, drawer fronts, toe-kick, panels and molding to fit not only the AKURUM and SEKTION lines of kitchen cabinets, but also BESTÅ, GODMORGON, and PAX cabinets.
- We offer professional design and cabinet layout services.
- Our doors look great alongside IKEA's stock doors.
- We offer floating shelves, wine racks and other custom pieces.
- Samples are available for all materials listed in this catalog.

Our doors are made to order based on your specifications. Simply choose a material from any any of the exciting series we offer, and provide us with a cabinet layout, and we'll do the rest. In 2-4 weeks your doors will be ready for pick-up or delivery. It's that simple!

## BESPOKE series

BESPOKE is our top of the line series of wood veneer doors. With BESPOKE, we offer you a variety of wood species, both domestic and exotic, to choose from. Here we present you with all-natural, unadulterated wood in all its glory!

Bespoke doors are made-up of a natural wood veneer laminated to our “Multi-Core” body, and finished with a durable,

semi-gloss lacquer finish. Our Multi-Core body is made by laminating a layer of plywood between two sheets of MDF. We have found this combination to give superior strength and stability over standard MDF cores.

Of course when dealing with any natural wood product you have to expect some inconsistencies and sometimes even wide variations in color and grain, but this is countered by intricate grain figuring, and a richness and depth which is simply impossible to recreate in any man-made product. So while we are excited and proud to offer sustainable products like our URBO and RENU series, our collection of custom doors just wouldn't be complete without this exquisite series of doors, panels and drawer fronts straight from nature!

Plain Sawn Walnut

Rift White Oak  
RWO-02

African Mahogany  
AM-03

Vertical Grain Fir  
VGF-04

Plain Sawn Teak  
PST-05

## RENU series

With our RENU series doors, we are able to bring you the full beauty of real wood, from domestic to exotic species, without impacting the sustainability of these great forests. This is made possible by using wood fiber from responsibly managed and renewable trees and manipulating it through computer design and technology to replicate any of a variety of more highly sought-after species. The resulting product not only captures the depth and beauty of those species, but it does so with a consistency and continuity of color and grain pattern not possible with traditionally milled lumber.

All of this means nothing however if the product looks fake or man-made, and that's where this material stands apart. Because our RENU Series uses real wood fibers, there is a natural randomness to its grain and subtle variations in color which betray any sense of the artificial. So while our RENU series of doors, drawer-fronts and panels is slightly less expensive than our BESPOKE series of natural wood doors, we honestly think it's the look and not the price that will win you over!

## URBO series

Our URBO Series doors are fabricated from a designer Italian composite material. This unique material is made from a combination of paper fibers and resin which, when combined, create a surface that is both warm to the touch and alive with texture. Here you will find an exciting array of colors and grain patterns which evoke the look and feel of exotic hardwoods, reclaimed lumber, and even distressed or weathered wood.

Makassaro  
LK00

Cypress Point  
S013

Toasted Espresso  
S071

## URBO series (continued)

With our URBO Series, you'll enjoy a durability and ease of maintenance unobtainable with natural wood products, along with the satisfaction of knowing your doors, drawer fronts and panels are all made using sustainable, recycled materials.

URBO Series doors are also made to the highest emissions standards: with emissions of .05ppm or less they exceed even the strict European and Japanese standards.

## CRAFT series

Our CRAFT series is simplicity itself. Clean classic and timeless, this shaker style door would look amazing in any home, and will never go out of style.

Our CRAFT DIY doors come unfinished, allowing you the freedom to paint them the perfect color to fit seamlessly within the design of your home. The doors and drawer fronts are made with a paint-grade solid wood frame and an MDF inset panel, and come sanded and ready for your creative touch!

Our Fir and White Oak CRAFT doors and drawer-fronts are made with a solid wood frame and a matching plywood inset panel. These doors come finished with a semi-gloss lacquer finish which is not only durable, but really brings out the beauty of the grain.
